About Me

I have a single goal in mind - to build the next big thing.

I love working with like minded people on something that'll positively impact the lives of millions out there. I believe in hardwork and smartwork with like minded individuals, growth and profits will definitely follow. My experience founding Skinvincible AI and Stonks Media reflects the above commitment.

Experience

Founded Skinvincible AI

Nov 2023 - Present

India's First AI Powered Skin Care Assistant

As the Founder of Skinvincible AI, I got the ball rolling by building the initial prototype, securing funding, and hiring our team. We reached over 10,000 users during our beta phase. Now, we're focusing on B2B, currently offering services like hairstyle suggestions and skin scans to select top-tier salons in India. I developed the prototype myself, led the fundraising and managed the team.

Founded Stonks Media

Jun 2024 - Present

Pune's Leading Marketing Firm

At Stonks Media (Pune's leading marketing firm), we provide marketing and offline growth solutions to select clients, handling their social media, ads, and offline strategies. We work with top real estate & logistics businesses, major restaurant chains, and a few startups in Maharashtra, generating over 10 million+ organic views monthly for them (ads are separate). Plus, we manage a few influencers on Instagram and YouTube who have millions of followers, really boosting our clients' visibility.

I've personally achieved 165 million+ views on my personal X account.

6to9Tech and GPT4- Max (Sold)

Aug 2023 - Jul 2024

Tech Newsletter and a Free Alternative to ChatGPT

For 6to9Tech and GPT4-Max, we quickly gained thousands of email newsletter subscribers. Our free ChatGPT alternative, GPT4-Max, attracted around 7,000 daily active users by offering paid ChatGPT features, including unlimited access to GPT-4, free of charge specifically for our newsletter subscribers.

Personal

I am the aerodynamics engineer and media and marketing head for my college's Formula Student team (Kratos Electric) and we've built India's best Formula Student car (Winners of Formula Bharat 2025).

I've completed 165 million+ views on my personal X account, and got a reply from Elon Musk himself as well. I post about tech, news and memes. I'm also known for finding a lot of ChatGPT bugs. ([See List](#) - You Might've Seen a Few).
